#### STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUTCHINSON (for himself and Mr. DAYTON):

S. 1058. A bill to amend the Internal Revenue Code of 1986 to provide tax relief for farmers and the producers of biodiesel, and for other purposes; to the Committee on Finance.

Mr. HUTCHINSON. Mr. President, the debate over energy use in America has gripped our national attention for well over a year. A week doesn't go by that you don't pick up a newspaper or magazine and read at least one story about our Nation's domestic or foreign energy crisis. One issue in the energy debate that has caught my attention and that of farmers in my State is renewable fuels.

The technology to convert agricultural crops into combustible fuel, suitable for use in modern diesel and gasoline engines, has existed for more than 100 years. I believe this process continues to hold great potential for America. The production and use of biofuels offers our Nation a safe, renewable source of energy for travel and transport, not to mention the long-term economic benefits for farmers and consumers.

That is why I rise today to introduce the Biodiesel Renewable Fuels Act. I am pleased that Senator DAYTON has joined with me as my lead cosponsor. This bill encourages the use of biodiesel by establishing a tax credit for manufacturers who produce a blend of conventional diesel and soybean or oilseed additives. By reducing the diesel fuel excise tax, suppliers will receive a 3-cent-per-gallon credit for using a diesel blend that contains at least 2 percent biodiesel. This tax credit is very similar to the existing tax incentive for ethanol, a biofuel made from corn-based products. I believe a tax incentive for soy-based biodiesel will increase domestic production and capture the agricultural, environmental and economical benefits associated with using this renewable source of energy.

Most Americans don't realize that farm communities sit atop a vast and virtually untapped source of renewable fuels in the form of agriculture crops. Farmers in Arkansas are interested in developing new markets for soybean and oilseed products. In Arkansas for example, farmers grew 94 million bushels, or 2.5 million metric tons, of soybeans last year. Nationally, farmers produced 2.6 billion bushels of soybeans in 1999–2000, equal to 72 million metric tons. The oil derived from soybeans and other oilseed crops can be refined into a diesel additive or diesel alternative. According to a USDA study released in 1996, an annual market for biodiesel of 100 million gallons in the United States would raise the price of soybeans by up to seven cents per bushel. Given the recent U.S. soybean crop, that kind of annual market would result in more than \$168 million directly related to the use of soy-based biodiesel.
